EDUCATION

Veermata Jijabai Technological Institute (VJTI), Mumbai 2021 – 2025
Bachelor of Technology (B.Tech.) in Information Technology

Relevant Coursework: Data Structures and Algorithms, Operating Systems, Computer Networks, Distributed Systems

EXPERIENCE

Axis Mutual Fund Jun 2025 – Present
Software Development Engineer *Mumbai, India*

- Engineered production Java/Spring Boot APIs powering investor-facing wealth management features across SIP, Lump Sum and Goal Planning workflows on a regulated fintech platform at scale.
- Improved Lighthouse scores from 20–30 to 70–80 by applying SSR, Critical CSS, Akamai CDN caching and lazy loading — diagnosing and resolving production performance bottlenecks across B2B and B2C investment platforms.
- Built an enterprise RAG platform (LlamaIndex, GPT-4o/Claude, Qdrant, Redis) enabling investment analysts to securely query proprietary research documents, with metadata-based access control preventing document leakage.
- Collaborated directly with Product, QA, and Business teams across sprint planning and production release cycles to deliver financial features in an Agile environment.

Wizzer Advisor Pvt. Ltd. Jun 2024 – Aug 2024
Software Engineer Intern *Mumbai, India*

- Reduced API response times by integrating Redis caching for high-frequency investment data queries and migrating hot endpoints from Express to Fastify, cutting redundant database roundtrips.
- Built and optimised Node.js backend services for an investment advisory platform, delivering production enhancements within a small Agile team.

PROJECTS

CBASNet – Satellite Change Detection Jan 2025 – Apr 2025
PyTorch, TorchVision, OpenCV, NumPy, Scikit-Learn, Matplotlib

- Achieved 98.53% classification accuracy on the LEVIR-CD+ satellite imagery dataset by designing a Siamese U-Net enhanced with CBAM attention and ASPP multi-scale pooling for urban change detection.
- Built modular, reproducible preprocessing, training, evaluation and visualization pipelines using PyTorch, OpenCV and NumPy, enabling reliable experimentation at scale.

Investment Research Report Generator Jul 2025 - Dec 2025
Python, FastAPI, LlamaIndex, Qdrant, Amazon Bedrock, AWS (S3, Lambda, API Gateway, DynamoDB)

- Cut analyst report-generation time from 2–3 days to under 30 minutes by building an end-to-end LLM pipeline (Amazon Bedrock, LlamaIndex, Qdrant) that ingests annual reports, concall transcripts and financial data to auto-generate research reports and answer ad-hoc questions.
- Architected the full system solo on FastAPI and a serverless AWS stack (Lambda, API Gateway, S3, DynamoDB), applying Redis caching and metadata-based access control to ensure performant and secure document retrieval.

TECHNICAL SKILLS

- **Languages**: Java, Python, JavaScript, TypeScript
- **Backend**: Spring Boot, Node.js, Express.js, Fastify, REST APIs, Microservices
- **Databases**: PostgreSQL, MongoDB, Redis, Cassandra
- **Messaging**: Apache Kafka
- **DevOps**: Linux, Nginx, Docker, Jenkins, GitHub, CI/CD
- **AI/LLM**: Amazon Bedrock, LlamaIndex, RAG, GPT-4o, Qdrant
- **Concepts**: System Design, OOP, Agile, Production Support, Distributed Systems

ACHIEVEMENTS & LEADERSHIP

- AWS Certified Cloud Practitioner (2024).
- Solved 700+ Data Structures & Algorithms problems across LeetCode, Codeforces, and CodeChef.
- **Executive & Sponsorship Head, Pratibimb (VJTI)** – Led sponsorship outreach and event execution for Pratibimb, VJTI's annual techno-cultural fest, over a year-long tenure.
- **Core Team Member, Community of Coders (COC), VJTI** – Mentored the entire junior batch through 10–12 sessions annually and helped organize hackathons, competitions, and technical workshops as part of the core team.
