EDUCATION

Veermata Jijabai Technological Institute (VJTI), Mumbai 2021 – 2025
Bachelor of Technology (B.Tech.) in Information Technology

Relevant Coursework: Machine Learning, Deep Learning, Statistics and Probability, Linear Algebra, Data Mining

EXPERIENCE

Axis Mutual Fund Jun 2025 – Present
Data Scientist *Mumbai, India*

- Built an enterprise RAG platform (LlamaIndex, GPT-4o/Claude, Qdrant, Redis) enabling investment analysts to query and synthesize proprietary research documents, with metadata-based access control and reranking to improve retrieval precision.
- Instrumented 200+ GA4 and Google Tag Manager events across investor journeys, applying behavioral analytics to expose funnel drop-off patterns and inform product decisions directly from data.
- Designed and deployed LLM-powered document intelligence pipelines over large unstructured financial corpora, cutting analyst research turnaround from days to minutes.
- Collaborated with Product and Business stakeholders to translate analytical requirements into production implementations, operating end-to-end from data instrumentation to model serving.

PROJECTS

CBASNet – Satellite Change Detection Jan 2025 – Apr 2025
PyTorch, TorchVision, OpenCV, NumPy, Scikit-Learn, Matplotlib

- Achieved 98.53% classification accuracy on the LEVIR-CD+ satellite imagery dataset by designing a Siamese U-Net enhanced with CBAM attention modules and ASPP multi-scale pooling for bi-temporal urban change detection.
- Improved detection of small-scale and complex urban infrastructure changes by combining spatial and channel attention with multi-scale context aggregation — evaluated using Accuracy, Precision, Recall, F1-Score, and IoU.
- Built modular preprocessing, training, evaluation, and visualization pipelines using PyTorch, TorchVision, OpenCV, NumPy, and scikit-learn, enabling fully reproducible experimentation.

Investment Research Report Generator Jul 2025 - Dec 2025
Python, FastAPI, LlamaIndex, Qdrant, Amazon Bedrock, AWS (S3, Lambda, API Gateway, DynamoDB)

- Cut analyst report-generation time from 2–3 days to under 30 minutes by building an end-to-end LLM pipeline (Amazon Bedrock, LlamaIndex, Qdrant vector database) that ingests annual reports, earnings call transcripts, and historical financial data to auto-generate research reports and answer ad-hoc research questions.
- Designed the RAG retrieval and prompting architecture end-to-end: document ingestion, chunking, vector indexing, reranking, and LLM generation — supporting both structured report output and free-form Q&A over the same corpus.
- Solo-built the full production system on FastAPI and a serverless AWS stack (Bedrock, Lambda, API Gateway, S3, DynamoDB), handling data pipeline, model serving, and API design.

TECHNICAL SKILLS

- **Languages**: Python, SQL, C++
- **ML / DL**: PyTorch, TensorFlow, scikit-learn, XGBoost, LightGBM, NumPy, Pandas, Matplotlib
- **Generative AI**: LLMs (OpenAI, open-source), LlamaIndex, RAG pipelines, Prompt Engineering, Qdrant
- **Graph AI**: PyTorch Geometric, GNN, GCN, GAT
- **Data Engineering**: Apache Spark, PostgreSQL, MongoDB, Redis
- **MLOps / Infra**: Docker, AWS (Bedrock, S3, Lambda, DynamoDB), Git, Linux
- **Concepts**: Feature Engineering, Imbalanced Learning, Model Evaluation, Distributed Systems

ACHIEVEMENTS & LEADERSHIP

- Developed a novel PCANet-based crop change detection methodology using multi-temporal satellite imagery.
- Completed Google Machine Learning Crash Course (2024).
- **Executive & Sponsorship Head, Pratibimb (VJTI)** – Led sponsorship outreach and event execution for Pratibimb, VJTI's annual techno-cultural fest, over a year-long tenure.
- **Core Team Member, Community of Coders (COC), VJTI** – Mentored the entire junior batch through 10–12 sessions annually and helped organize hackathons, competitions, and technical workshops as part of the core team.
